THRESHERS' LICENSES

Important Notice.

All operators of Threshing Rigs and Combines in Alberta are required to be licensed, the fee being \$1.00. Those operating without license are liable to prosecution.

Licenses may be secured through rural Municipal Secretaries, the District Agriculturists, or by sending fee direct to

ALBERTA DEPARTMENT OF AGRICULTURE
 EDMONTON, ALBERTA

Tennis Club Dance.

At a meeting of the Executive of Stony Plain Tennis Club it was decided to hold their annual dance on the evening of Friday, July 13. The affair will be held in Kelly's Hall, and lunch will be served. Members are invited to bring their friends.

Changes in Game Act.

Changes in the Game Act include shortened open seasons for prairie chicken and Hungarian partridge, and reduction of game fees. Resident bird game fee is cut from \$2.50 down to \$2, and resident big game licenses are \$1, instead of \$2.

Open season on prairie chicken has been reduced to 10 days—Oct. 1 to 10, and Snipe, Plainers must go south of N Saskatchewan river for their chicken.

Dominion Election, Oct. 14

Mr. J. S. Lambert, returning officer for Edson Jasper Electoral division in the election for the House of Commons, to be held on Monday, October 14th, has established an office in the hamlet of Spruce Grove. Proclamations to this effect are posted on the boardings in this district.

Change in Text Books.

Two new text books for children attending grade 7 classes in Alberta schools are the only changes made in text books required during the school term opening Sept. 3d. A new mathematics text book which includes a modern treatment of this subject in a general way rather than in the form of the old arithmetic books, and a new Canadian Reader are the new additions.

No important changes in text book requirements are said to be planned by the Dept. of Education until such time as the suggested changes in curricula for secondary schools are implemented.

Naturalisation Papers.

In answer to several inquiries, it may be stated that applications for naturalisation as Canadian citizens are continuing to be received at the office of the Clerk of the Supreme Court, Edmonton. These applications will be held for consideration until the Courts re-open in September, after the summer vacation.

Several hundred applications are now on hand awaiting action, and will be dealt with in Chambers, it is expected, when the Supreme Court and the District Courts resume their sittings.

Those applicants who failed to get their naturalisation papers in time to enable them to vote in the recent election, are more anxious than ever to receive their papers giving them the right to cast their ballot at the forthcoming Federal election Monday Oct. 14.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college, ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of denied and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprising development, in fact more so. The world will not stand still; neither will man be backward. Since the beginning of time and the dawn of civilisation the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips of practically everybody to-day—Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hires' Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of to-day?

It was 1890 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$45 a month he took his shop along, and in 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was rated a billionaire.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut out crude solid tires and stitted them to buggy wheels. Thus began the great tire industry of to-day.

H. J. Heinz used to grow horse-radish in his garden and peddle it from door to door. This backyard venture put him on the road to becoming Heinz 57.

In 1886 a doctor in Atlanta stood working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rushed over, purified carbonated water into a glass containing a sample of syrup, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hires was served a drink by a farmer's wife. Its ingredients were sassafras, teasberries, and sweet fern, all gathered locally. Hires smacked his lips. Returning home he experimented with herbs, roots and berries. Thus was Hires' Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bill of goods from a wheelbarrow. Adam Gimbel, founder of the stores which bear his name, started with a pack on his back. Timothy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten-cent stores is too well known to call for repetition. The great Crabe Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of to-day had very humble beginnings, many of them within the life of the present generation. Opportunities are just as great to-day. "What's going to alter our lives is probably happening this minute in a backyard workshop, where some crank is thinking by himself," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea. They are beginning in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in the United States selling many different products told about four new products, all launched since January, 1930, and now selling widely. David was not afraid of Goliath, and observant youth with an idea or capable of assimilating one, with vision, enterprise and daring can just as successfully win out against the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in Forbes' Magazine, from which much of the above is taken, says: "Ten years from now we will be reading more success stories gathered from the kitchens and cellars of 1935." No one who has a work-bench or a stove, and a dollar—and an idea—he says, need be discouraged.

Scrambled Eggs

Motor Accident Settlers Truckload Of Eggs Over Highway

Marion Snyder, of Harlan, Ind., knows what 100,000 scrambled eggs look like.

Driving a truck over Pocono Mountain near Mt. Carmel, Pa., Snyder was forced to turn the machine sharply to avoid hitting a train. His cargo of 100,000 eggs was scattered over the highway for some distance. Practically all of the eggs were broken.

Rainbows are not seen in circles, but complete circles. If we were high enough in the air, we could see the entire circle.

British laundries have an annual revenue of approximately \$10,000,000 from handkerchiefs alone.

Leprosy reached the United States from both Europe and Africa.

A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar

Lord Londonderry, British Secretary of Air, has just celebrated his 57th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes. It stands on his estate at Mount Stewart, Newlands, Northern Ireland, where there is already an airport with a landing field of 50 acres.

The deep-sea fish, Chlamodion Niger, famous for its voracity, sometimes manages to swallow a fish larger than itself.

More common colds are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going.

"Gift Was Acceptable"

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyalists in the Irish Free State have given King George is declared to be not only nationally appropriate but most acceptable to His Majesty. It is a beautiful antique silver potato ring. These rings, which measure up to a foot in diameter, were in former times put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets, to keep them from rolling about. Reminiscent of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold at auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

Strange Service

700 Deaf Mutes Worship In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 deaf and dumb persons from 14 nations pray and sing without a sound being heard. They were athletes attending the fourth international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and missionaries mounted the lofty pulpit and vociferously acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

FASHION FANCIES

ATTRACTIVE HOME ENSEMBLE THAT HELPS TO MAKE KITCHEN CHORES SO EASY

By Ellen Worth

Every woman knows she can't have too many home ensembles that will tub and tub and always come up smiling.

And to-day's model is just lovely. The dress is made of the finest linen, garden, porch, marketing, etc. And incidentally, it's decidedly slimming to the heavier build.

The dress is blue and white dainty. The apron is white dainty which is also used for the dress trim.

And isn't the one-piece apron attractive? It has suspender straps and it won't slip off the shoulders.

Size No. 10 includes the dress and the apron in sizes 16, 18 years, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Size 16 requires 2 1/2 yards of 36-inch material for dress with 1 1/2 yards of 36-inch material for apron and dress collar.

Patterns 15c each. Address: mail orders to: Pattern Department, Wings Needlework Union, 172 McPeters Ave., New Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day. The price is 15c.

Marking The Ballot

Strange As It May Seem, Many Voters Miff The Job

Placing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will miff the job.

In the 1930 contest 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have only to make the crosses themselves. Yet in 1850 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens and deputy returning officers throw out their ballots. On recounts, however, judges frequently have ruled such ballots valid. The Election Act says the cross must be made with a black pencil.

Many persons start to mark their X opposite the wrong name, see it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new ballot.

Voters sometimes ask why all this fuss about markings when the voter's choice is plainly indicated? The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '90's and earlier when the population was small, party workers knew which voters were Conservatives, which Liberals and those "on the fence." Of the undecided variety some would sell their votes and the temptation of workers in a close race was strong.

But unless the vote buyer could be sure those he bought went to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result has been the regulations to prevent distinguishing marks.

Election workers claim there is very little direct bribery now. Ridings are so populous and party affiliations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

Would Solve Problem

Shipment Of Eggs From England Made As Experiment

A few dozen English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane, and a railway journey of 500 miles from Brisbane to Sydney. The rest reached Rio Grande do Sul, Brazil, after travelling more than 6,000 miles from London by airplane and Graf Zeppelin. Now Lord Greenway, the promoter of the experiment, is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. If the eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

American Boy Divers

Crude Combination Of Many Articles Enables Boy To Submerge

Three Maine youths wanted to see what the bottom of Kennebec River in Richmond, Me., looked like.

So the boys, Paul R. Dyer, Stanley Griffin and Robert Cate, constructed diving apparatus from a stove-gasoline pump, two automobile tire gauges, a small corrugated can and some cement.

Successful in their first attempts, they plan to explore greater depths.

It has been estimated that approximately 19 pounds of air is required to burn one pound of coal.

You can tell by his smile

Things are looking up... times have improved and he's again "rolling his own" with Ogden's Fine Cut. Why not "get back to Ogden's" yourself and again give yourself the pleasure Ogden's alone can give. Use the best papers, too... "Vogue" or "Chanticleer".

52 Poker Hands, any number, now accepted as a complete set.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plus

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew around the world in eight days, 15 hours, and 15 minutes, in 1931.

In 1933, he made a solo round-the-world flight, in seven days, 18 hours, and 49 1/2 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged suit" of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mae."

Odd Trick Of Nature

Sailor Relates Story Of Three-Year Bath In 33 Fathoms

Nelson Lash was in the crew of the scalloper, Virginia, three years ago when she was rammed and sunk off Georges Banks. With his clothes in a forecastle locker was a pocket handkerchief, his initial embroidered in a corner.

Now Lash has his handkerchief again, for he's in the crew of the Louis A. Threland, and in her scallop drag the crew found a handkerchief—with Lash's initials in the corner, in almost perfect condition after a three-year bath in 33 fathoms!

The oldest fruit known to mankind is the olive.

Work Of Reclaiming Drouth Stricken Areas Proving A Major Task

If the work being started this year to reclaim drouth-stricken areas of western Canada had been undertaken 20 years ago "the farmers would not be facing the serious situation they are to-day," declared a statement issued by the prairie farm rehabilitation advisory committee. Dr. E. S. Archibald, director of Dominion experimental farms, is chairman of that committee.

Reclaiming sections where soil drifting had been exceptionally severe was a major task in itself, the statement said. This work was being directed by Dr. E. S. Hopkins, Dominion field husbandman. "Large scale co-operative efforts by which groups of farmers will undertake strip farming, the planting of trees for shelter belts around farm houses, buildings and a paddock, are also being launched. It is hoped to have whole townships included in this co-operative scheme."

Applications from 4,800 farmers have been received for shelter belts, assistance in constructing small dams and other means of conserving water for domestic and general use on the farms. The committee intended to give all the assistance possible to these applicants.

Millions of trees were being provided to farmers and careful study made of the effect of trees as wind breaks. The drouth resistance of various grasses was being studied.

Provincial governments on the prairies as well as the universities and farmers' organizations were co-operating in the work.

The prairie farm rehabilitation act, introduced into the common law session by Hon. Robert Weir, minister of agriculture, provided \$750,000 for rehabilitation work this year and \$1,000,000 would be voted under it in each of the next four years. In addition \$500,000 has been allotted under the public works act for water developments.

South Africans Like Cereals

Chops And Steaks Losing Place On Breakfast Table

South Africa at one time was a great meat-consuming country, and twenty years ago chops and steaks were fixtures on the breakfast menu. To-day they are a rarity, and cereals of the wheat variety have taken their place. And it is a fact that there is a marked difference in the physique generally of the present generation when compared with their parents and grandparents. The young people of to-day are not nearly so largely built.

The story of the opening of the trades exhibition in an English town where the committee of the butchers' section presented the mayors (who opened the exhibition) with a joint of prime beef in lieu of a bouquet of flowers, presents a moral to the trade in South Africa, says a correspondent of the Cape Argus. He suggests a slogan: "Eat Meat to Avoid Defeat."

The Soy Bean

Is Used In Many Food Products Including Ice Cream

Chemists have found the soy bean useful in many spheres. From it are now made, in addition to valuable cattle feed, paint, oil, varnish, enamel, dyes, buttons, trunks, electrical parts, printer's ink, glycerine, celluloid, glue, soap and rubber substitutes.

In the realm of foods for which the soy bean is useful are sixty-five different products. There is even soy bean ice cream. The soy bean has been a farm crop in the Orient for centuries. Chickens make milk, butter and cheese from it. It is first grown on this continent in 1904.

Some people think new foods should please everybody. It isn't true. Politicians may envy the moon. It always comes back after an eclipse.

Long Range Forecasts

Establish Definite 25-Year Cycle Of Weather Changes

Devastating drouths such as that of 1934 may in the future be predicted years ahead as accurately as tomorrow's weather is now forecast.

Dr. C. G. Abbott, secretary of the Smithsonian institution and outstanding authority on radiation of the sun, announced new results of his studies of the effect of variations in the sun's rays on the earth's weather which hold great promise for long-range weather forecasting. Analysis of his data shows he secretly predicted the 1934 drouth with a high degree of accuracy.

He has established a definite 25-year cycle of weather changes which is apparently dependent on a double sun-spot cycle in solar radiation. In this cycle temperature and rainfall at numerous points over the surface of the earth approximately duplicate conditions at the same points 25 years before.

Dr. Abbott was quick to point out that the repetition would not follow exactly from month to month each 25 years, but that in general, normal or abnormal weather could be expected to recur at approximately that interval. Thus another major drouth may be expected to occur in 1907.

Largest Open-Air Zoo

Is One Of The Seven Wonders Of East Africa

After a visit to the famous Ngoro Ngoro volcano crater, where in a depression many miles wide, thousands of wild game of all kinds disappear themselves in what is the world's largest open-air zoo. Sir Harold Macmillan, governor of Tanganyika, has outlined plans for making it possible for automobiles to reach the rim of the crater. This will enable tourists to view one of the seven wonders of East Africa.

Until as late as 1942, Lower California was believed to be an island instead of a peninsula.

The amount of branded beef sold in Canada during June, 1935, was 3,312,601 pounds.

Fur Farming In Canada Grows In Recent Years To Considerable Proportions

A Monster Camera

Bridge In San Francisco Bay Throws Picture On Concrete

The world's largest camera has been discovered by accident in the middle of San Francisco Bay. The "camera" is the centre anchorage of the huge suspension bridge. It is a concrete affair about the height of a fifteen-story building, 197 feet long and 82 feet high.

Vent holes near the top of the tremendous box act as pinhole lenses, so directing the rays of light from outside that they cast an enormous picture on the concrete partition a side that divides the anchorage in two. The vent holes cut in the six-foot walls are rectangular apertures 1 foot by 2 feet. The pictures on the "plate holder" of the giant camera are of course upside down, as in all cameras. They show the bridge towers and passing ferry boats, sometimes in natural colors, sometimes in black and white, depending on the time of day. The principle of the pinhole camera is an old one. Long before the development of light sensitive materials for photography, medieval nobles had small apertures cut in the walls of their houses so that they could watch life in the street outside reflected on the white wall of a darkened room.

Model Lifts Big Weight

Toy Steam Engine Capable Of Lifting Half A Ton

Perhaps the only toy model stationary engine in the world capable of lifting 1,000 pounds has been constructed by Walter Gregory, Quincy, Mass.

The engine, made at home, is run by steam, and technical experts have travelled many miles to see it.

The boiler dimensions are: Height, 24 inches; firebox, 9 inches high; three-quarter-inch tubes, 15 inches long.

The SNAPSHOT GUILD

Watch Your Perspective

"Distortion is possible if you work it (left), or it can easily be avoided."

What would your girl friend or wife say if you told your appearance with her picture after the Sunday outing, showing her with enormous feet such as those in the picture to the left?

After would probably be determined when you made the familiar statement, "Well, dear, the camera never lies. But the truth is that the camera is liable for it because of the lens law."

Evidently the amateur who took this picture held the camera too close to the subject. The feet of the subject were probably less than half the size of the feet of the subject when you made the familiar statement, "Well, dear, the camera never lies. But the truth is that the camera is liable for it because of the lens law."

Perspective in a picture is determined by the point of view from which the lens makes the picture, so after all the camera did not tell a lie.

White like, but portrayed exactly what it was, just about what you eye would see if one looked at the subject from the same point of view. This is a which is called "perspective" and is the key to making portraits or making "close-up" of any object, we should be able to see that no part of the subject is very much nearer the camera than the rest.

In the picture, we are sometimes likely to permit our subject to stand well forward on the camera's axis. If we do this, the hand will appear abnormally large. Notice how the hands in the top is a natural position and close to the body with most of the fingers folded under.

Now you should know how and how not to get distortion in your portraits so let your conscience be your guide.

JOHN VAN GUILDER

Not all furs which Canadian fur companies turn into wearing apparel come from animals which roam the northwoods of the Dominion. Many of the animals which carry the most valuable fur coats have never seen the northwoods. Neither they nor their parents and in many cases their grandparents have ever seen or known the freedom of the bush. They were born and raised on farms devoted entirely to the raising of a fur crop. Government figures show that there are at least 6,473 fur farms in Canada and that their annual "output" of furs is valued at \$3,712,443.

The idea of fur farming came from the habit of trappers to capture alive young foxes and keep them near their cabin till the animals' fur coats were in their prime. So fur farms were started and fox became the main fur-bearing animal kept on these farms. The silver fox was the animal most sought by the fur farmers and so valuable did their pelts become in the early days of fur farming that a pair of silver foxes for breeding purposes cost as high as \$85,000. To-day 93 per cent of the crop of the fur farms is silver fox.

But though fur farming has become a big business, with farms throughout Canada, it is by no means perfected. At Sumnerland, Prince Edward Island, there is a government experimental fur farm. And here scientists are busy developing methods whereby better furs can be raised on the farms. Diets for captive animals are given much attention and experiments are now being carried on to discover the best time of the year to supplement the regular rations of these farm-raised furbearers with vitamins A and D to produce a good growth of pups.

Experimenters have found what they think will overcome one of the great difficulties of fur farming—parasites which infest the animals. No matter what methods have been tried, what precautions have been taken, external parasites are to be found on the animals. The Summerland scientists have developed what they now believe is a sure cure, the spraying of all kennels, nests and all the wood-work of the pens with kerosene oil three times a year. Other experiments now going on are revealing new information regarding the influence of protein content in rations on the development of fur; whether or not meat, mackerel and fish meal could replace fresh meats during summer months; work is now progressing to determine the iodine requirements of silver foxes in captivity.

While foxes are the main animals on the farms, other furbearers are also being raised, including mink, muskrat, fisher and fish. The mink in particular is easily domesticated and there are now 577 mink farms in Canada. Muskrat farms are rapidly multiplying and during the last three years more muskrat skins were raised than any other kind. But the silver foxes, still being in the infancy, with \$267 of the high price last year, for one skin, are the most valuable.

Fur farms, in case you are interested, have a capital investment of nearly \$15,000,000 by the latest government statistics, while the animals on the farms are valued at \$7,500,000.

There remain, of course, a great many trappers who depend upon the native wild animals for existence and for their livelihood. The trappers are still the "forest denizens" and the "hills and mountains" are their domain. The trappers are still the "forest denizens" and the "hills and mountains" are their domain. The trappers are still the "forest denizens" and the "hills and mountains" are their domain.

Long Service. The Canadian National Railways was recently retired from service after having run 780,000 miles, reports the Canadian National Railways. It was the last of the "single wheelers" in public passenger service and was built in 1888. The most distinctive feature is the single pair of driving wheels, which are seven feet in diameter.

WORLD HAPPENINGS
BRIEFLY TOLD

French war veterans on a friendly visit to Canada, were hosts to prominent Montreal war veterans and militia men.

Since Jan. 1 six swimmers in the harbor at Sydney, N.S.W., have been attacked by sharks and only two have survived their injuries.

The high price of pork has made the hunting of wild hogs a paying sport. The meat brings about nine cents a pound in Texas.

A Corning, N.Y., minister's wife was denied United States citizenship because she refused to subscribe to the stipulation that she bear arms for the United States in time of war.

Bound for Idaho, a shipment of 75 purebred Suffolk rams left Calgary recently. The sheep were consigned to breeders at Caldwell, Idaho, marking a new export outlet for Alberta.

Despite poor crops, the Doukhobor communities in the west will meet their obligations this fall. M. W. Czakoff, Veregin, Sask., is reported as stating.

A television broadcasting tower is being built on top of the Eiffel Tower in Paris and is expected to provide regular service after three months' testing.

Apple and other fruit trees will be planted in Moscow streets instead of the usual shade variety. State farms were ordered to cultivate 140,000 fruit trees to be planted at Moscow beginning in 1938.

The crushing blow which flood waters dealt to the lines of the Northern Alberta railroads last month will necessitate immediate repair conservatively estimated at \$250,000.

The Soviet Union's grain acreage as of Aug. 15 totalled approximately 142,000,000, an area comprising 68 per cent. of the cultivated cereal lands, it was announced. The figure is about 7,000,000 acres above that for the same date last year.

William Green, president of the American Federation of Labor, said in a speech before the state labor federation's convention that the six-hour working day and the five-day working week must come, if jobs are to be given those who did not have them.

Gifts For Aviators

Winnipeg Pilots Going To South Pole Wear City's Crest

When Pilots H. Hollick-Kenyon and J. H. Lymburner fly down the Lincoln Ellsworth expedition down in the South Polar regions during the coming summer months of the southern hemisphere, they will wear pinned to their breasts, two small silver replicas of the coat-of-arms of Winnipeg.

The gifts were presented to the men by Mayor John Green at a dinner given by the Aviation League of Manitoba. "These mementoes," said the mayor, "will carry the good wishes and the high hopes and expectations of the people of Winnipeg for your success."

"But they are like a Scotch gift," his worship added. "There is a string attached to the giving. When you come back next May, I presume the Aviation League will have a celebration in honor of your return, and we want you to hand them back to the mayor of Winnipeg then so that they can be framed and kept in the city hall as mementoes of the interest the city of Winnipeg has in this expedition, which we hope will be historic."

J. B. Coynes, president of the league, said Manitoba has a special interest in polar expeditions by reason of the fact Franklin tried to find a northwest passage to the Orient north of Canada, and so gave a lead to Arctic exploration.

The flight which will be undertaken by Lincoln Ellsworth, with Hollick-Kenyon piloting, between Wrentham and Ross Sea, is 2,800 miles as far as from Montreal to Vancouver.

Only the very poor or the very rich are able to own more than one dog.

French military authorities have ruled that bandmen must learn to be telegraphers too.

IN VICTORIA, B.C.

It's Victoria's tree-shaded motor roads that have helped to win for the city the name of Canada's Evergreen Playgroud.

Acrobatic Roller Skaters

Three High-Speed Russian Artists Performing in London

The most "revolutionary" Russians in the world have arrived in London. They are the Three Cosacks, high-speed acrobatic roller skaters, (two men and a girl), who whirl round at 150 m.p.h. on a table only eight feet square.

"This is the smallest table anyone has ever skated on and lived," John Gajkoszky, the leader, said at the Savoy, where the trio are appearing in cabaret.

"There is a black line running round the table several inches from the rim. All the time we are spinning we keep our eyes on that line and never go outside it."

"Our slowest speed," he said, "is 60 m.p.h. and when working up to a climax we sometimes touch 150 m.p.h."

The Three Cosacks' chief fear is "centrifugitis"—breaking of blood vessels in the eyes or legs due to their becoming overloaded in the high-speed whirling.—London Daily Mirror.

Story of Homer's Iliad

Professor R. A. Dura has placed in a London safe deposit manuscripts 3,000 and 4,000 years old, which, he says, prove that the story of Homer's Iliad, greatest of classical Greek poems, the epic of Helen of Troy, whose face "launched a thousand ships," originated in an Indian epic written centuries before Homer was born.

Insect Killing Machine

Engineer Uses Artificial Fever To Annihilate White Ants

A neat little gadget that applies the "artificial fever" method of treating certain human diseases to the problem of ridding the civilized world of unpleasant insects is on exhibition at San Francisco.

Electrical Engineer E. L. Brown, inventor of the apparatus, demonstrated its use before a score or so of California's most noted scientists, who watched with great interest while Brown annihilated a colony of termites flourishing in a piece of wood he had with him.

Termites, ant-like creatures that live in and on wood, are fast becoming a major menace in American life, according to recent surveys. In fact, they are estimated to cost American property owners about \$50,000,000 each year, and the possibility of their eradication excited great interest among the assembled scientists.

Brown's insect killing machine operates with "cold heat." Short radio waves passing between two electrodes have the effect of generating sufficient heat to kill the bugs without setting the wood in which the little nuisances are living, afire.

The cornerstone of the original U.S. capital was laid by President Washington on Sept. 18, 1793.

Blue, green, yellow, red and even black snow has fallen in various parts of the world.

SUNDAY SCHOOL LESSON
SEPTEMBER 1

PAUL
(Worker With Hand And Brain)

Golden text: In all things I gave you an example, that so laboring ye ought to help the weak. Acts 20:35. Lesson: Acts 20:33-35; Philippians 4:1-13.

Devotional Reading: Acts 22:3-10.

Explanations And Comments

Paul's Example, Acts 20:33-35. Paul urged his hearers to follow the example he had set. He had not coveted wealth, but had labored for his own support and that of others; see Acts 18:3; I. Cor. 4:12; I. Thess. 5:18. In all things his life had been an example to them, and they in their turn should labor and help the weak. By "the weak" Paul probably means those lacking in means. Recall Carey's words: "My business is preaching the gospel; I cobble shoes to pay expenses."

It is a great thing to be able to say as did Theodore Roosevelt: "I am glad beyond measure that I am one of the many who have stood ready to spend and be spent; pledged to fight while life lasts, the great fight for righteousness, and for brotherhood, and for the welfare of mankind."

There was one way in which they could help the weak, Paul reminds them by quoting the words of Jesus, "It is more blessed to give than to receive." These words of Jesus are not given in the Gospels, and they are the only saying of his that Paul records.

Paul's Inventory of the Mental Furnishings of the Christian, Philippians 4:6-9. "Finally, brethren," says Paul. He has said this once before (3:1), but he is loth to conclude his letter to the church he loves so well. One word more he must add, and that word is the climax of his exhortations. "After he had insisted that his hearers have faith and resort to prayer, the peace which God gives will guard their hearts and minds," he proceeds at once to insist that his readers must do their part by controlling their minds and thoughts. The paragraph which enjoins trust in God is thus followed by an exhortation to high thinking and noble effort." (C. R. Erdman).

Found Mexico Interesting

Rotarian Delegates Report Temperature Even And The Climate Ideal

No need to go to Alaska to be cool in Egypt to the pyramids according to Mrs. E. B. Flint of London, Ont., who with her husband, attended the Rotary International convention in Mexico City. It's never too hot and never too cool down there, and the Aztec pyramids are almost as interesting as the famous ones on the banks of the storied Nile.

Mexico, situated 7,500 feet above sea level, has an even temperature, never above 78 and never below 60, the visitors were told. It has retained many quaint customs. In a city of more than 1,000,000 inhabitants there are only two machine laundries. Mrs. Flint said, for the women still adhere to the primitive method of washing their clothes in the streams with a flat rock to rub on.

The pyramids built by the Aztecs several hundred years ago, were of great interest, and not the least amazing feature was a primitive but effective shower installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids. The Floating Gardens, where land is so valuable that no houses are built on it, was also another place of interest. It is possible to raise seven crops of corn a year on this land, and if a man sells a strip he merely digs another canal instead of building a fence to define the boundary.

Monster Ice Breaker

Russian Ship Will Keep Northern Sea Route Open

Declared by Soviet authorities to be the largest ice-breaker in the world, a ship with 24,000 horsepower engines is being constructed near Leningrad. The new craft will be able to cross the 4,000 miles of the northern sea route without refueling. Other ships can follow in its track, great icebergs melting the journey. It is hoped that Arctic exploration also will be facilitated.

Dear Old Soul—But, doctor, if this is going to make me 10 years younger, how do I stand about my old-age pension?" 2113

Little Journeys In Science

IRON

(By Gordon H. Guet, M.A.)

Iron has played a very important role in the history of mankind and for many centuries has been the most useful of all the metals. The iron used by ancient man was soft and malleable. Some of the early peoples made chariots and defensive weapons of it, but sword that would bend easily was of little use as compared with weapons of stiff bronze. The smiths of the eighth century knew how to harden and temper iron and they ushered in the age of chivalry with steel-clad knights. The products of these skilled workers of the medieval forges—Toledo blades, Damascus scimitars, Italian chain mail, and Moorish armor—are famous in song and story. Indeed, they were almost as good as their legendary reputation.

Iron occurs very abundantly in nature and makes up about five per cent. of the earth's crust. Scientists have calculated that the centre of the earth consists of a sphere of metallic iron 4,000 miles in diameter, and covering this sphere is a layer of silicate of iron and magnesium 1,000 miles thick. If this be true, iron is by far the most abundant element in the world. Iron is found combined with other elements in many minerals and in most rocks and soils. It is a constituent of the green coloring matter of plants and the hemoglobin of the blood of animals, and hence it plays a very important part in life processes.

Hematite, known by the scientist as ferric oxide, is the most important of all iron ores. This ore is found in large quantities in the neighborhood of Lake Superior in the states of Minnesota, Wisconsin and Michigan. It is interesting to know that hematite gives a red color to certain soils and rocks. Finely divided hematite is used very extensively as a pigment.

Brown hematite, or limonite, is another very important iron ore. This mineral imparts a brown color to soil. It is present in many ordinary clays, and when they are used to make brick and earthenware, the material turns red when it is fired. Magnetite is another important iron ore and this mineral is attracted by a magnet, which fact is sometimes used in separating this material from crushed earthy matter. Lodestone, a natural magnet, is a variety of magnetite.

Iron differs from some of the other metals used in the industries in that the pure metal is rarely obtained and its application is limited. Iron which contains small quantities of other elements shows a great range of properties and is of the greatest industrial importance. Carbon is always present in quantities which range from slight traces up to seven per cent. There are many varieties of commercial iron, the chief of which are pig iron, cast iron, wrought iron, and steel.

Demand For Lemons

People In Italy Are Using Them For Their Health

A report from Washington says there is a lemon shortage, due to the falling off of imports from Europe, and is accounted for by the Italian purchases of lemons for the use of the Italian expeditionary force against Ethiopia.

That, however, is not the whole truth. Americans returning from Italy report that country completely sherry on the subject of lemons. The Italians have discovered that the lemon is not only a preventive of scurvy, but a reducer of high blood pressure and a cure for fallen arches. A dozen lemons a day keep the doctor away. A gentleman in Cremona is reported to have healed himself of whatever ailed him by consuming 60 lemons a day.

The enormous demand for lemons to keep Italians healthy has put under requisition the entire Sicilian crop, and lemons are being imported from Spain, Portugal and Greece. The Italian colonists in Africa are rolling in wealth.

From the medical standpoint there is something to be said for the new craze, for in a country where butter is scarce and nearly everything is cooked or doused in olive oil, acid in the diet is essential.

Meanwhile the Italian consumption of lemons is bringing joy to Californian growers, who hope that prices will go up still further.—Detroit News.

Prunus is to attempt to grow rubber, and 80,000 trees are being planted.

The fellow who tells you how hard he works wouldn't have time to tell you so if it were true.

Household Arts

PATTERN \$250

Dress up your kitchen so you will be proud of it! Add decoration with these effective mummy toppers. Kitchens are the heart of the home and it is a different household task—each lends itself to the use of a variety of colors—and there's one for each day of the week. Make them for the baker—for a bridge prize—a shower gift. Their droll design will make them welcome anywhere.

In pattern \$250 you will find a transfer pattern of seven motifs averaging 2 1/2 x 7 1/2 inches; material requirements and color schemes. To obtain this pattern send 50 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 378 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

FEDERAL FUND WILL ELIMINATE LEVEL CROSSINGS

Ottawa.—With \$1,000,000 at its disposal for the elimination of level crossings, the board of railway commissioners is awaiting applications from local authorities for expenditures from the fund. Hon. Hugh Guthrie, chairman of the board, announced. As a general rule, the board will pay 70 per cent. of the cost of crossing elimination out of the fund, leaving 30 per cent. to be paid by the province, municipality or railway interested.

The money was appropriated by parliament under the Public Works Construction Act, passed last session. The governor-in-council is authorized to determine the amount to be paid from the fund and by railways, provinces and municipalities to the improvement of particular crossings for the protection of motor traffic. All applications so far approved have been on the basis of 70 per cent. from the fund.

"A number of applications have already been received by the board," said Mr. Guthrie, "for expenditures out of this fund, and up to the present time 15 applications have been approved from various parts of Canada involving an expenditure of \$452,000."

By province, the applications so far approved are: British Columbia, \$12,496; Saskatchewan, \$35,486; Ontario, \$300,967.32; Quebec, \$4,950; Nova Scotia, \$7,922.66.

No applications have yet been received from the provinces of Alberta, Manitoba, New Brunswick or Prince Edward Island.

Drouth Plan

Interest Shown In Water Development Scheme

Ottawa.—More than 4,800 farmers and ranchers throughout the drouth area of the prairie provinces had applied for assistance under the water development scheme organized as part of the Prairie Farm Rehabilitation Act, Agriculture Minister Robert Weir stated.

"The problem of supplying a more adequate and dependable water supply for domestic use and livestock, and for irrigation where feasible, for the growing of feed and garden stuff is a vital one on many farms and ranches," he said.

"Of the total applications received to date, nearly 350 are from Manitoba, over 2,800 from Saskatchewan, and somewhere around 1,400 from Alberta."

Arrest Suspected Spies

Two Nazis Taken Into Custody By French Police

Metz, France.—Police announced they had uncovered ultra-modern methods used by alleged German spies with the arrest of two Nazis. Louis Altmyer, 25, and Jean Hunsinger, 30, who police called "spies" for another alleged spy, were nabbed as they crossed the border.

Authorities said Altmyer had a pocket lamp capable of throwing red and green beams, enabling him to signal in code over long distances. Police claimed both men confessed to espionage. They are being held in jail.

Repair Costs Heavy

Edmonton.—The crushing blow which flood waters dealt to the line of the Northern Alberta railway last month will necessitate immediate repair conservatively estimated at \$250,000, it was believed in railway circles here. It was estimated that ten miles of track along the shores of Slave Lake would have to be rebuilt.

Takes Over New Job

Ottawa.—C. B. Davidson, member of the Dominion Marketing Board and wheat expert of the bureau of statistics, left for Winnipeg to become secretary and administrator of the new wheat board. The new board meant his resignation from the government service.

Thanksgiving Day

Changed From Monday To Thursday This Year

Ottawa.—Opposition to any further change in the date of Thanksgiving Day for this year was expressed by Hon. C. H. Cahan, secretary of state. Churches favored Thursday instead of Monday for the holiday.

The secretary of state has responsibility for deciding the date. Originally it was fixed for Monday, Oct. 14, but when that was selected as election day, Thanksgiving was moved to Oct. 24, a Thursday.

"For over 40 years," Mr. Cahan said in a statement, "Thanksgiving Day was always fixed for a Thursday in October. The day as the king's proclamation always states is fixed as 'a day of general thanksgiving to Almighty God' for the blessings with which Canada has been favored during the year."

In later years the churches of Canada have complained that as a weekend holiday the religious character of Thanksgiving Day has been almost completely lost sight of, and that the day has become one for holiday excursions and frivolous entertainments, which are not consistent with the objects for which the day was originally set aside."

March Of Troops

Preparations For War Seen In Italy

Rome.—Italy's military consciousness grew steadily as the extent to which the energies of the nation are bound up in preparations for an East African war became increasingly clear.

The streets of Rome continually resounded to the measured tread of detachments of troops moving through the capital on their way to embarkation points. Uniformed men were everywhere—streets, sidewalks, cafes, restaurants, parks and shops. Military news dominated space in newspapers.

The Giornale d'Italia extended the editorial olive branch to Great Britain, but the offer was on the promise that Britain should come to appreciate the validity of Italy's East African policy. It argued Italian occupation of Ethiopia would be to Britain's advantage because it would be a "stable presence."

Free Of Rust

Alberta Crops Escape Damage And Some Good Yields Expected

Calgary.—Alberta crops are free of rust this year and "bumper" yields are expected in some areas. Dr. G. B. Sanford, head of the Dominion laboratory of plant pathology, University of Alberta, reported here on his return from an inspection tour.

Dr. Sanford, who visited fields near Edmonton to Lebridge, east to Medicine Hat, and through the irrigation area, estimated crops on irrigated lands south of High River would average 25 bushels to the acre. In Calgary district and north, he said, the return will be much higher, while around Okla and Edmonton rust had "disappeared" and crops were expected to be bumper crops.

To Pay For Road

Soviet Government Accepts Flour From Japan

Tokyo.—The Soviet government has contracted to take 400,000 sacks of Japanese flour in part payment for the former Chinese Eastern railway and further similar orders are anticipated, according to the newspaper Komintern.

The transaction is believed largely responsible for a considerable rise in the price of Japanese wheat and flour.

The agreement between Manchukuo and Japan for the railway payments, which the Japanese government has agreed to make, is believed to be the first of a series of similar payments which might be in products of Manchukuo and Japanese origin.

Prize Crop Estimate

Winnipeg.—A prize wheat crop of 2,000,000 bushels was estimated by the Seale Grain Company in its report on the prize wheat crop. The prize crop last year was 283,000,000 bushels. 2113

HON. JOHN T. HAIG

Winnipeg man who has been a member of the Manitoba Legislature for many years, appointed to the Senate.

Says Consent Needed

Closing Of Suez Canal Must Have Approval Of France

London.—United States Senator James P. Pope of Idaho, stated here that Great Britain is powerless to close the Suez canal to Italy, in the event of war, without the approval of France.

"The British government cannot do this because of the peculiar ownership set-up of the canal," he said. "I have learned that the British government owns only 44 per cent. of canal shares, the remaining 56 per cent. being public traded, with most of them held by the French."

"The board of Suez directors is composed of one Dutchman, 10 Englishmen, and 20 French, with important executive offices held by Frenchmen."

Too Much Publicity

Dr. Dafoe Says Quintuplets Need More Sleep

Callander, Ont.—The five little Dionne girls are not yet sufficiently grown-up to do without sleep and as a result Dr. Allan Roy Dafoe, their physician, has decreed their public appearance must be reduced from four daily to a couple of showings.

"It is just a precautionary measure," said Dr. Dafoe, who explained so many people had been visiting the hospital daily for each of the four appearances that the sleep of the babies was being interrupted.

Cabinet Transacts Business

Passes Orders To Be Approved By Governor-General

Ottawa.—Cabinet council sitting Aug. 20 for the first time in a week, passed some orders-in-council respecting the Public Works Construction Act, it was learned, but no details will be made known until they have been approved by the governor-general or his deputy.

It was assumed the contracts referred to the railway equipment orders for which, under the Supplementary Public Works Construction Act of last session, \$15,000,000 was voted. Under that act the government was empowered to advance money to finance rail equipment orders for both the Canadian National and Canadian Pacific Railways, repayable by arrangements as an unemployment relief measure.

No appointments were made. Prime Minister Bennett said at conclusion of the council session. It is expected a minister of marine will be appointed shortly, this being the only outstanding vacancy now remaining.

Would Recognize Pilot

Alaskan Airman May Be Awarded Distinguished Flying Cross

Washington.—The Distinguished Flying Cross was asked for Joseph E. Crosson, Alaskan airman who flew the bodies of Will Rogers and Wiley Post from Point Barrow to their homeland, by the Alaska delegate in congress. Delegate A. J. Dimond pointed to other outstanding flights by Crosson including the discovery of the body of Carl Ben Elson lost on the Siberian coast, his aid to Wiley Post when the latter was setting a globe-circling record, and other humanitarian flights in the northland.

Keep Tab On Speed

Automatic Movie Camera For Campbell's Bluebird

London.—A small automatic movie camera will be installed in the cockpit of Sir Malcolm Campbell's Bluebird when the British speed king attempts to drive his racer 300 miles per hour on the plains of Utah next month.

The camera will make a continuous record of the instruments' reading while the great car thunders over the course, and not only will afford an authentic record of the revolutions attained, but will permit Sir Malcolm to keep his eyes off the instruments and concentrate on driving.

PRINCE'S SON SHOES A HORSE

Lord MacDuff, son of Prince Arthur of Connaught and grandson of the late Prince of Wales, was seen here shooting a horse, part of the regular training course. The occasion was marked by his activities at Mer Lodge in the Highlands. Attached to the Royal Scots Greys, the young Prince is seen here shooting a horse, part of the regular training course.

A THRIFT DRIVE INAUGURATED BY PREMIER HEPBURN

Toronto.—Economy screws, tightened by the Ontario cabinet in a special session, squeezed out the Ontario agricultural development board and started a thrift drive which Premier Hepburn said would affect three major departments, health, northern development and relief.

The agricultural development board, thrown entirely into the discard, was organized by the former Drury government. Provision was made to collect the \$49,000,000 invested in farm loans.

Final winding-up of the farm loan business will be made under the direction of James Fraser.

The premier said the government was not barring farmers from loans by this action because the federal government had stepped into the field. He added the government of late had to borrow money to re-loan under the agricultural development scheme.

Orders were given to 49 inspectors working for the board that their services would be required no longer. Work of the inspectors, one to each \$1,000,000 invested in farm loans, had been to inspect farms as loan risks and to work in the collection routine. They cost the government on an average of \$10,000 a month, Mr. Hepburn estimated.

Latest figures showed there were 16,500 farm loans made and more than 500 farms were on the government's hands.

Mr. Hepburn said it was costing the government more than 33½ per cent. to collect on either the interest or the capital.

To Guard British Legation

Bomb Proof Shelter Being Built At Addis Ababa

Addis Ababa.—The British legation has taken steps to construct bomb proof shelters for the small British force that will protect the legation in the event Italy attacks Ethiopia. The British purchased 6,000 square yards of heavy, corrugated, galvanized iron sheets for the shelters. These also will provide quarters for British officials.

Sinla, India.—An official announced that Indian troops were being despatched from Bombay to reinforce the guard at the British legation in Addis Ababa.

The small force selected consists of a detachment of the fifth battalion of the 14th Punjab regiment, stationed at Poona.

Highway Improvements

Work To Commence On Road Between Winnipeg and Brandon

Winnipeg, Man.—Extensive improvements on the Trans-Canada highway between Winnipeg and Brandon will be undertaken shortly by the provincial department of public works.

This work is to be paid for on a 50-50 basis by Dominion and province.

Tenders have been called for by Hon. W. R. Chubb, minister of public works and labor, for asphaltizing 25 miles of the highway west of Portage in the prairie, for grading and graveling eight miles of highway west of Headingley, and for constructing the steel and timber bridges at different points along the highway.

Position Of Dominions

Great Britain Goes To War New Zealand Would Be Involved

Wellington.—Premier George V. Mackenzie stated that any war in which Great Britain became involved was automatically the concern of New Zealand.

While the prime minister was holding regular cabinet sessions, a statement was issued that any war in which Great Britain became involved was automatically the concern of New Zealand. Mr. Mackenzie said that any war in which Great Britain became involved was automatically the concern of New Zealand. Mr. Mackenzie said that any war in which Great Britain became involved was automatically the concern of New Zealand.

Wm. Aberhart, party leader
and Premier-elect, stated in
Calgary on Tuesday.

A Comparison.

On checking over the results
for the various ridings thru-
out the province it appears
that Mr Bryan received a
higher percentage of the votes
cast than nearly any other un-
successful candidate in the
province; and he was one of
the only candidates, in the
face of the Social Credit land-
slide, to increase the actual
number of votes cast for his
party over the 1930 figures.

No Call Yet for Harvest Help

There has been no great demand
as yet for help for harvest opera-
tions by farmers of this district. The
recent heavy rains have retarded
the ripening of the grain, with re-
sultant delay in cutting opera-
tions. Alberta Labor Commission-
er Smith claims the situation in
this province will be handled with-
out importing men from other
provinces.

Force of Habit.

Tut—Why did you break your con-
tract with that school teacher?
Mut—I didn't turn up one night
and see wanted me to bring a writ-
ten excuse signed by my mother.

BRIAR PIPES JUST RECEIVED

25 CENTS.

SPORTING NOTES OF LOCAL INTEREST

Now that Pat and Albert
are back from their journey to
the great Meca to the east,
local sports should be decid-
edly on the upgrade. For the
past week, however, due no
doubt to frost or politics, local
sports were at a standstill.

Last Wednesday the Golf
club held a very successful so-
cial and most club members
and a few from the Tennis
fraternity turned out for the
sampling of the good home
products in the evening.

Monday, Sept. 2d, the last
big holiday for the summer
months, the golf and tennis
clubs will give the great finale
to the present season in the
form of a big social. A big
turnout is expected, and all
players from both clubs are
advised to come early and
leave late, and make the best
of the course and courts, as
both are now in excellent
shape.

The Tennis club will wind
up its season with a big sports
dance to be held in Kelly's
hall Sept. 13. You are advised
to keep this an open date and
come and join the fun.

Argentine Farmers Peevish.

In Argentina, where farmers
are supposed to be subservient and
docile and content to take any
price for their product, trouble has
broken out over the government's
agricultural measures and shooting
in the Argentine Parliament caused
the death of one man and the
wounding of another. Disaffec-
tion with the situation in regard to
agricultural prices is said to be at
the root of the trouble. Apparen-
tly when Argentina farmers are
aroused they believe in direct ac-
tion.

MINARD'S
 "KING OF PAIN"
 LINIMENT

MISS ALADDIN

—By—
 Christine Whiting Parmenter
 Author of
 "One Wide River to Cross"
 "The Unknown Port," etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the middle of a crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted. Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him what way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one. Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to find that the Columbine residence all lit up, and asks Matthew if he knows why. He said: "Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

Now Go On With The Story

CHAPTER XIV.—Continued

"She was a courageous woman, my mother, but I have sometimes wondered what was in her heart as she set me on my feet and looked toward that door, unarméd. Did she expect to confront a battle? No, I think not. What met her eyes was a single brave, and a boy or possibly seven years old. No doubt the Indian looked sinister enough. Only the week before a woman not many miles away had been seized and mutilated. The horror of that story was still upon her; yet she did what many have been the only thing that protected herself and me. My mother smiled! It was, I imagine, a smile born out of terror, but to that grimacing Indian it was a gesture of friendliness. Who knew it had been there more such gestures, but page of our history would have been less tragic. And then, although her hands were so tightly clenched that (she found later) the nails had pierced her flesh, she looked straight up at him and said: 'Then Nancy, words which sounded strange to her own ears in such a moment. For

what you have guessed them, that was my wonderful little mother said was 'Merry Christmas!'"

Miss Columbine paused, and there was silence until Aurora Tubbs exclaimed: "But you don't tell us that that wild Indian knew what she said; Miss Columbine! It's not believable."

The old lady seemed to be looking at something far away.

"Not the words," she answered, "but perhaps he understood the smile; and she spoke gently. He came into the room, followed by his boy, and stood, arms folded, looking down at that small, gay tree and that poor little girl who knew no fear. For a moment I was too absorbed to note the callers; then, glancing up suddenly, I laughed with pleasure. Here was another child! I heard the old aunt say that the Indian boy could see it. 'Look!' I cried joyously. 'My new baby! See!'"

The boy reached out and took it from me, his white teeth gleaming in a quick smile. The man grunted something unintelligible and moved nearer the tree. He seemed, my mother told me, both puzzled and admiring, little as the child weighed, and what it was all about. He touched it yellow butterfly made from a scrap of paper; said something more, letting his glance rove slowly about the room. Her heart quickened as his eyes rested on the ride; then suddenly, he turned to me, no more to touch it. The boy, still admiring my homestead doll, said something rapidly and took from his neck a string of beads, holding them out to me. It was, my mother understood, meant as an exchange for my clothe-pin.

"My lip trembled, but she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently I was desirous of doing something for the other Indian, for I lifted the paper butterfly from its branch and held it out to him, saying: 'It's your Kismus gift, my 'Merry Christmas!'"

A breath of pleasure swept through her audience as Cousin Columbine ceased speaking; then she continued: "I seem to remember the Indian stooping to take my offering. I knew it was good, though that was not my mother never corroborated. He grunted a word or two, intended, she was sure, as thanks; gave me more curious look at the small tree; and then they left us, those strange, strange Christmas guests, mounting their pack horses, and riding into the forest. I was left alone, and I was glad to be alone."

"And did you ever see them again?" questioned Eve Adams, her low voice very gentle.

"Never again. What they came for—where they were going, we never knew. And only I had found their mounds close to that half-burned door, the clear, sweet note of a hermit-thrush. Not until then did my valiant mother give way to tears."

Matthew Adams, gravely, said: "Is the nicest Christmas story I ever heard. Miss Columbine."

"And," suggested his mother, going to the melodeon, "let's end our evening by singing some of the good old carols."

That night when the guests had departed and the Nelsons were alone, the door was opened, and

to you at first, but I'm getting to rather like it. Perhaps it's the uniform. They say that sooner or later a woman always falls for a uniform. I'm 'sorry 'you' weren't downstate this evening, General. It—it was a wonderful debut!"

CHAPTER XV.

It was at Christmas dinner that Nancy divulged her plan for the Alaska Library, a proposition which met with instant enthusiasm. John Adam readily agreed to supply the sign; and one day in January brought it in from the ranch.

"Dad's been so temperamental you think he was painting a picture for his Art Museum," he declared. "Honestly, Nancy, since you wished this job on him that man's neglected his cooking shamefully; but the sign's a corker. 'I'll say it in!' Nancy spoke almost with awe. 'I never expected anything so professional, and those Aladdin lamps at either end are stunning. Your father must have spent a lot of time on this sign, Mark. Can you put it up if we go over to the schoolhouse now?'"

I came prepared, lady; and there's a box of books at the station, which our sweet young Denver cousin collected for you. Matt'll be down to finish the shelves this afternoon, and—Hi there, 'Aurora Tubbs! Come see this sign."

Aurora emerged from the kitchen, and stood, arms akimbo, admiring eyes on John Adam's handiwork. "If it don't look exactly like a boughten one," she exclaimed. "But if those fancy things is meant for lamps, Mark Adam, they must be terrible old-fashioned, this hard to tell. Your father's a regular artist, ain't he? I wonder—would be better me some callin' cards. I've hanker'd for some of the silly things ever since Victor's cousin Ella had some writ by a one-armed soldier who was 'doin' 'em in a doorway in Denver."

"Sure he'll do 'em for you," Mark promised recklessly. "Hello, Miss Columbine. Just look at Father Adam's masterpiece!"

Cousin Columbine gazed briskly down the steps.

"It's a beauty," she said, "it's Nancy, her face glowing."

"It surely is! Are you going to put it up to-day, Mark?"

"Soon as I swipe a ladder out of your barn. You'll have to come along, Nancy, and boss the job."

"These days were full of interest for Aunt Louise, and the girls at school had responded generously to Nancy's plea for books. Mother and Dad had doubled the number; Phil had collected twenty more; and Aunt Judy, immediately on hearing about the scheme, had sent a check for the purchase of new ones."

No check had ever looked so big to Nancy Nelson; or been so welcome; and one day Mark drove her to the Springs to purchase this important addition to her library."

noticeably relieved; and Nancy exclaimed: "Oh, dear! we only went to a movie. I didn't dream that you'd be worried, Cousin Columbine."

"No more I should have," snapped the old lady, "if Aurora hadn't harped on the idea. Mark Adam, you'd better call up your mother. No doubt she's wondering where you are."

"And me, worryin' myself sick for nothin'," grumbled Aurora. "A movie! Not even a flat tire; and us wonderin' if your necks was broken."

That day seemed long ago to Nancy when on an afternoon in February she went down the unkempt street, turned at the filling station, and ascended a low hill on which stood the abandoned schoolhouse, "erected in 1902," Cousin Columbine had told her, to replace the one destroyed by fire. It was a small frame building with no pretense at beauty; but the girl paused for a moment to admire John Adam's handiwork before she unlocked the door.

The air outside was warmer than within, and Nancy opened a window heavily, but the girl paused for a moment to admire John Adam's handiwork before she unlocked the door.

Little Helps For This Week

God is not unrighteous to forget your work and labor of love which ye have showed toward His name, in that ye have ministered to the saints, and do minister. Hebrews 6:10.

Wherever in the world I am, In whatsoever estate, I have a fellowship with hearts To keep and cultivate, And a work of lowly love to do For the Lord on whom I wait.

We do not always perceive that the commonest things, the writing of a note, the making of something intended as an offering of affection, our necessary intercourse with characters that have no congeniality with our own, may have the performance of a most blessed and sacred work, even the carrying out, after our feeble measure, the design of God for the increase of happiness. Definite work is not always that which is cut and squared for us, but that which comes as a claim upon the conscience.

Tackles Big Job

Mayor Of New York Aims To Make

New York City, with all its hustle, bustle and commotion, free of unnecessary noise, is the job tackled by Mayor F. H. LaGuardia. Shrieking autos, blaring radios, rumbling trucks and noisy garages—anything that makes a noise—are to be curbed. Street police patrol teams and fire engines must not use their sirens unnecessarily. Heading the mayor's planned program is a month of "noiseless nights." He thinks everyone should be able to enjoy sleep uninterrupted. That campaign will operate through October, Friday, during November, will come a month of hoped-for "noiseless days." The mayor thinks that by the end of that month he'll have everybody enjoying 24 hours of quiet each day. The mayor has created the job of "NAC" (Noise Abatement Commissioner) and given the portfolio to Major Henry Curran. Major Curran now is in Europe studying noise abatement systems.

Rabbits Cause Floods

Dykes Built Near New Orleans

Rabbits Have been responsible for serious floods in the Swiss canton of Valais. Intense heat throughout Switzerland has melted an unprecedented quantity of snow, which has swollen the headwaters of the Rhone into flood tides.

This rare contingency is provided against by dykes built on the banks of the rivers. These, however, collapsed due to the fact that they had been improved many times over by vast colonies of rabbits.

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a healthy wife and mother, she will thank you.

Sold at all good drug stores.

POLIOMYELITIS—INFANTILE PARALYSIS.

This is a communicable disease belonging to that group of diseases caused by a virus. This virus is spread from the sick to the well, and from those carriers who harbor the virus altho apparently perfectly well. The transfer is made thru the secretions of the nose and mouth, in which secretions the virus leaves the body of the sick person or the carrier.

It does appear that the virus is widespread and that the vast majority of persons receiving it into their bodies do not develop the disease; they do, however, develop an immunity or resistance to the disease because of their experience.

Unfortunately this does not always happen, and in some persons, the virus, for reasons which we do not know, is able to cause the disease, infantile paralysis. But even when disease actually occurs, many escape the paralysis which is the typical symptom in the public mind.

The virus of poliomyelitis invades the spinal cord, and the paralysis which results is due to the destruction of nerve cells in the cords which control the action of muscles. The cells which are destroyed never grow again; damaged ones may recover.

Parents are advised that, as occasional cases occur even when there is no epidemic, to consult their doctor if their child becomes feverish, drowsy or irritable, or suffers from vomiting, or pains in the head, back or extremities.

Successful Roultrymen!

Are demanding the "Gillespie Feed" brand poultry and Dairy Feeds. Why? Because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results.

ALBERT FISCHER DIED ON SUNDAY LAST.

Albert Fischer, an old and respected citizen of Stony Plain, passed Sunday morning, Aug 25th, at the family residence on Second avenue, in his 60th year.

He leaves to mourn his loss his loving wife; 1 son, Carl, at home; 3 daughters—Mrs John H Miller, Stony Plain; Mrs M Roberts, Edmonton; Miss Emma, at home; 2 brothers and 4 sisters in Germany.

The funeral service was held on Wednesday afternoon from the family residence at Stony Plain to Glory Hills Reform church, with the pastor, Rev O H Seppert, officiating.

Interment was made in Glory Hills cemetery.

Judicial Sale of Farm Property by Tender.

Pursuant to the Order for Sale and the Directions of the Honourable Mr. Justice Ives, sealed tenders will be received for the purchase of the

N.E. of Sec. 36, Tp. 61, Rg. 3, W. 5th Mer., containing 100 acres more or less, reserving thereout all mines and minerals.

The vendor is informed that this land is situated 7 miles from Duffield, and one-half mile from the nearest school. About 70 acres have been under cultivation, and there are about 20 acres of hay land. There is on the property a frame house 20' x 22', a barn 24' x 32, and a hen house 12' x 16', which buildings are in a fair state of repair. There is a well on the property, and it is fenced on three sides.

Tenders must be enclosed in sealed envelopes marked "Tender Fraser vs. Burton No. 25589" addressed to R. P. Wallace, Clerk of the Supreme Court, Edmonton, Alberta, and must be in his hands not later than 12 o'clock noon on the 23rd day of September, 1932.

TERMS OF SALE.

Each tender shall be accompanied by a marked check or cash for 10 per cent. of the amount of the tender, and the balance of the purchase price shall be paid (unless the time is otherwise extended into Court within 60 days after acceptance of tender, without interest, or in the alternative the purchaser shall execute a mortgage for the sum of \$10,000, which shall be a first charge on the land, and the remainder of the purchase money shall be paid into Court within 60 days after the acceptance of the tender, without interest. The mortgage shall be for a term of 5 years payable in 5 equal annual instalments and shall bear interest at the rate of 6 per cent. per annum, payable yearly.

The deposit of 10 per cent shall be forfeited by the successful tenderer if he refuses to carry out the purchase after acceptance of his tender. Cheques of unsuccessful tenders will be returned to them immediately after rejection thereof. The highest or any tender not necessarily accepted. In all other respects the terms and conditions of the sale will be the standing conditions of sale of the Supreme Court so far as same are applicable hereto.

For further particulars apply to Messrs. Lyburn, Reid & Co., Ltd., 122 Taylor Building, Edmonton.

DATED at Edmonton, Alberta, this 25th day of August, 1932.
